

# Cruzer Enterprise

## Secure Enterprise-Grade Portable Storage

USB Flash drives have transformed from consumer gadgets into must-have productivity tools used by business professionals everywhere. However, most portable storage devices used in the corporate environment are privately owned and lack the security and control measures required by organizations. This exposes organizations to tremendous risks and liabilities when a device containing sensitive information is lost or stolen. Data loss can potentially lead to damaging results, such as expensive customer notifications, a compromised company image, and failure to meet regulatory requirements.

### Secure Portable Storage — Strong and Simple

Cruzer® Enterprise USB drives are specifically designed to meet the unique security, compliance, and manageability needs of enterprise-size businesses. It does not rely upon users to decide which files to secure. Instead it requires mandatory access control for all files, storing them in an encrypted, password-protected partition. This provides security and protects stored data in the event of device loss or theft. Cruzer Enterprise features ultra fast transfer speeds, a simple interface, and the ability to plug-and-play. It's intuitive and practical enough for users to start using immediately.

With hardware based encryption and mandatory access control, Cruzer Enterprise helps IT managers more effectively protect information on company-issued portable storage devices.

### Works in Harmony With Your Existing IT Infrastructure

Cruzer Enterprise helps make the introduction of secure, personal storage a simple and seamless process. Cruzer Enterprise requires very little effort to deploy or support, since it requires no installation of dedicated drivers and no administrative rights to operate. That means business professionals can easily and effectively take their data beyond the corporate network to personal home computers, customer sites, and hotel business centers — ensuring anytime, anywhere access to critical business information.

Cruzer Enterprise has also been rigorously tested with leading solutions which enforce policies on the usage of removable devices. This allows for Cruzer Enterprise to work seamlessly, without having to compromise endpoint security.

#### Product Highlights

- Powerful, hardware-based encryption
- Mandatory security of all files
- Aids in regulatory compliance
- Achieve greater control with central management software (sold separately)

**SanDisk®**

## Deployed by the World's Leading Companies

The world's leading companies understand the need to standardize on secure, company-issued portable storage devices. Cruiser Enterprise technology has already been internationally adopted by some of the world's leading organizations, including leading accounting firms, investment banks, and healthcare institutions.

## Specifications

### Product Features

- Hardware based 256-bit AES encryption
- Mandatory security of all files (100% private partition)
- Strong password
- "Lockdown" mode when a set number of incorrect password attempts are made
- Centrally manageable (using SanDisk CMC software sold separately)
- Ultra fast transfer speed — 24MB/s Read, 20MB/s write.\*

### Supported Platforms\*\*\*

- Windows 2000 SP4 or higher
- Windows XP SP1 or higher
- Windows 2003 server
- Windows Vista

### Optimized to Work With

*Note: No security technology can be guaranteed to be 100% secure and as such SanDisk cannot guarantee that your data will be secure from unauthorized access, disclosure, alteration or destruction.*

*\* Based on internal testings; performance may be lower depending upon host device. 1 megabyte (MB) = 1 million bytes.*

*\*\* Note: 1 gigabyte (GB) = 1 billion bytes. Some of the listed capacity is used for formatting and other functions, and thus is not available for data storage.*

*\*\*\* No driver installation required*
